ADVISORY

In view of reporting of certain incidences of delayed dressing of wounds by the indoor patients, it is suggested that:-

- The routine dressings (simple wounds) should be done in the respective wards only and it is to be ensured that the requisite dressing material/instruments are available in the ward itself.
- For any special dressings requiring help of surgeon (gangrenous wound, deep burns, requiring debridement, etc), a proper call should be made specifying the special need and it should be documented, such call should be attended on priority in the interest of patient care and for the infection control.
