No.52/DGHS/PH-IV/COVID-19/2020/prsecyhfw/ 17708 - 17727 Dated: 17/07/2020

OFFICE MEMORANDUM

An advisory (copy enclosed), dated 14-07-2020 was issued to all hospitals under GNCTD and private hospitals emphasising the need for effective interventional efforts under the overall framework of clinical management protocols laid down by Ministry of Health & Family Welfare, GoI from time to time with the objective of reduction in COVID-19 mortalities.

Since the Committees constituted for inspection of all hospitals in Delhi in GNCTD consequent upon orders passed by Hon'ble Supreme Court on 19.06.2020 are already carrying out their mandate in a continuous manner, it would be appropriate that specific attention may now be focused upon aspects which have a bearing on reduction of COVID related mortalities. In order to facilitate the Committees to focus on this critical issue, a checklist on specific points has been enclosed which may be taken on board by all the Committees in their subsequent visits to all hospitals in NCT of Delhi.

F.52/DGHS/PH-IV/COVID-19/2020/prsecyhfw/1

DATE-14/July/2020

ADVISORY

To ensure Quality Patient Care Services in COVID-19 in-hospital Patient Care Management, Ministry of Health and Family Welfare, Government of India has issued various guidelines, from time to time, including elaborate clinical management protocols. These guidelines, interalia, have the overarching objective of making effective interventions, thereby bringing about a reduction in the mortality figures.

Various other States have also evolved certain interventional practices, from time to time, which could be dovetailed into the overall framework of medical and clinical management as laid down by Ministry of Health & Family Welfare, Government of India.

An illustrative list of interventions involving end-to-end in-hospital management is enclosed herewith for necessary action, as may be applicable, in the context of a particular healthcare facility.

.....

PR. SECRETARY H&FW

ADMISSION MANAGEMENT

- Holding area to ensure monitoring of oxygenation status of patients.
- Effective Triaging to be ensured.
- Time taken for procedures such as admission, etc. to be minimized.
- High priority to be accorded to high-risk individuals like elderly, pregnant and pediatric patients, immuno-suppressed, patients with co-morbidities, cancer patients, transplant patients, etc.
- A dedicated well-trained team to be available round the clock for transportation of patients to appropriate treatment zones without any delay.

CLINICAL MANAGEMENT

- Clinical guidelines of Ministry of Health and Family Welfare, Government of India to be followed.
- Real time monitoring of SpO₂ to be ensured. Early warning Score Cards may be used for monitoring in wards. Any fall in oxygen saturation to be managed immediately and prompt remedial measures to be ensured.
- Oxygen therapy to be given in a staged manner as per the clinical guidelines of Ministry of Health and Family Welfare, Government of India.
- Hands-on orientation training to be provided to all healthcare workers engaged in COVID care in the hospital.
- Management of co-morbidities to be given adequate attention.
- Investigation protocol may be standardized to prevent incomplete sampling.
- Close monitoring of the clinical condition of COVID patients to be done by specialists and Senior Residents at regular intervals.
- Tele-consultation with experts from AIIMS may be done as required.

CRITICAL CARE

- Hands-on training in critical care to be given to doctors, nursing officers and technicians.

- 54
- Every critical patient may be allocated to one health care worker round the clock to ensure close monitoring.
 - Single command and control structure may be formed for better inter-departmental co-ordination.
 - Various teams may be formed from the available pool of human resources based on their expertise and the level of care to be provided to COVID patients.
 - Continuous Renal Replacement Therapy or Sustained Low Efficiency Dialysis with technician to be available as most of the critical COVID 19 ARDS patients develop Acute Kidney Injury.

HOSPITAL MANAGEMENT

- Proper asepsis to be maintained in all hospital areas for infection prevention and control. Checklists/charts may be maintained to ensure the same.
- Hospitals to report deaths in prescribed formats with accurate data.
- Internal Death Audit Committee of hospital to suggest remedial measures to lower mortality.
- Clinical Review Committee may be constituted as an Internal Committee of health administrators and senior clinicians to review the status on periodical basis for standardization of clinical outcomes across the facilities.

LIST FOR HOSPITALS FOR IN-HOSPITAL MANAGEMENT OF COVID-19

(Please tick mark and mention details wherever required)

A. ADMISSION & TRIAGE MANAGEMENT

1. Have you earmarked holding area in the hospital? Y/N
2. Do you monitor oxygenation status of patients in holding area? Y/N
3. What is the Current time taken in triaging? -----Minutes
Remarks -
4. What is the Current time taken for completing admission & other related procedures? -----Minutes

Remarks -

5. Do you have any mechanism to prioritise High Risk patients? Y/N
6. Do you have a dedicated well trained team available round the clock for transportation of patient specific ward/ICU/Casualty from the holding area? Y/N
Remarks -

B. CLINICAL MANAGEMENT

1. Do you follow any Early Warning Score Protocol/ Early Warning Cards? Y/N
Remarks -
2. Do you monitor SpO₂ level of patients at regular intervals? Y/N
Remarks -
3. What is the time taken to manage oxygen level in case of fall in oxygen saturation? -----Minutes
Remarks -
4. Do you have a standardised investigation protocol for patients? Y/N
5. What is the average gap between two rounds made by Specialists/Senior Residents in ward? -----Minutes/Hours
6. Have you made any Tele-consultations calls to AIIMS in past 24 hours ? Y/N
Remarks (clinical conditions due to which such calls were made)-
7. Is there any Standard Operating Procedure (SOP) for managing a patient in the ward whose condition suddenly deteriorates? Y/N
8. How long does it take to shift such a patient from the ward to the ICU? -----Minutes
9. What percentage of the beds in the ward are HDU beds? -----%

C. CRITICAL CARE

1. Do you have a Single command & control structure established for inter-departmental communication?

Remarks

2. Do you have CRRT/SLET facility in the hospital?

D. HOSPITAL MANAGEMENT

1. Do you maintain proper asepsis in all hospital areas for Infection Prevention and Control?
2. Have you constituted any Clinical Case Review Committee in hospital?
3. Have you constituted any Internal Death Audit/Review Committee in the hospital?
4. Is there adequate availability of PPEs, etc. to meet the requirements of Health care providers?
